

No injections, needles or surgical procedure.

A reduction in wrinkles of 11% -65% in the space of a few weeks.

SAFETOX Beauty is the only technique that acts directly on the muscles responsible for wrinkles without the use of needles or aggressive treatments.

SAFETOX Beauty is an electronic device that acts on the causes of wrinkles at a muscular level. The skin is merely the superficial covering of the real mechanisms that take place further down in the muscular tissue.

Certain muscles close up the face and cause wrinkles. SAFETOX Beauty relaxes these muscles, thereby altering the muscular balance in favour of the muscles at the rear of the head which open up the face and lift the skin.

SAFETOX Beauty holds the key to controlling the muscles dynamics of the face. With its active facelift effect, it helps to educate the face and to open it up.

A 5 minutes session each day over a period of weeks is enough to educate your muscles and restore the muscular dynamics of a youthful face: wrinkles are reduced; the face opens up and appears radiant and serene.

SAFETOX may be used in conjunction with other techniques (Anti-wrinkles creams, Botulism Toxin, Hyaluronic acid, Collagen, etc.) It may either replace them completely, reduce the need to use them or enhance the very localised effect of these other technique through its overall beneficial action to the muscular dynamics of the area.

Wrinkles reduction – facts and figures.

According to the different short, medium or long-term clinical studies carried out by STX-MED and also by a series of independent laboratories and various specialist skin hospitals, SAFETOX Beauty achieves a reduction in wrinkles count of up to 83.3% in the medium term.

Short-term results (after several sessions):

*Wrinkle depth:

- o Average reduction: -8.9%
- o Maximum reduction: -21%

*Skin texture:

- o Average reduction: -11.1%
- o Maximum reduction: -36%

Medium-term results (after 6 to 12 weeks):

*Wrinkle count:

- o Average reduction: -48.4%
- o Maximum reduction: -83.3%

*Skin length:

- o Average reduction: -47.4%
- o Maximum reduction: -81.3%

Several clinics observations have confirmed a reduction in wrinkles around the eyes in patients who have used SAFETOX for several month.
