marie claire.co.uk

Celeste said, "we were so impressed by Corioliss we decided to switch our brand of straighteners nine months ago & in fact we now sell the entire range; which includes the *Mini's*, *Ceramic / Titanium Ceramic Plates* with a *lifetime Guarantee*, exceptional value *Gift sets* & the *Pro Curl iron* as used in all our Hollyoaks shoots this year.

It's great to see **marie claire** agree with our decision, just a pity it took them so long to find out how brilliant they are!"

Corioliss C2 Ultra Slim Digital Straightener, £120

The lowdown: Hailed as the new ghds, the Corioliss is the most likely contender to steal the Best Hair Straighteners title straight out of its plates. Sleek, sophisticated and fashion-forward, these digital masterpieces include new Nano technology that cleans your hair while it straightens. **Best bits:** Where to start? The limited-edition leopard print version is on-trend and fabulous (snap some up – fast), but the result really speaks for itself. Tresses were left poker-straight – even lasting through to the next morning – yet soft and shiny. The size is perfect (not too thin, not too bulky), and the digital temp gauge is a dream. **Bad bits:** None we can think of. Oh, they're a bit pricey – but worth every penny. **Rating:10/10.** Every fashionista's must-have.
